BASE*match*™ is to assist with organizing and prioritizing hospital duplicate records to make the adjudication process more streamlined and efficient. **BASE*match*™** is your saving grace.

Medibase receives patient files from the client and loads the files into **BASE*match*™**. The data is then organized by patient data type to enable our staff quicker adjudication.

- **Flexibility and efficiency.** Our team of professionals work all times of day to ensure your needs are being met and we meet your deadlines. We understand how important it is to have a clean database and with BASEmatch we can help you to reach your goals and improve on patient safety issues

- **Organizing and prioritizing.** Our team is able to manipulate patient accounts in our database by using data mining. This will break the patient accounts up into specific statuses for our MPI staff to work accordingly; thus, working the accounts in a more streamlined and time saving manner.

- **Reporting.** Our tool has the ability to run reports based on client needs. Our IT team is able to create multiple types of reports, which can be run as needed
